Visiting the Big Ben

Visiting the Westminster Abbey

Collage of the UK trip

Visiting the
Kensington Palace

Visiting the
St. Paul's Cathedral

Visiting the
British Mesuem

Students' Feedbacks

Exploring London has fueled my curiosity about how things function and their creation. The city's beautiful functional architecture reflects brilliant minds and cutting-edge technology. Even at the Chelsea stadium, STEM elements abound—from **artificial lighting** to **stadium layouts**, **synthetic grass**, and **advanced cameras** for game analysis. It was an educational experience.

4A (2) GURUNG CHRISTINA

Students' Feedbacks

The Royal Observatory Greenwich played a pivotal role in the history of astronomy and navigation. Within its walls, historical figures meticulously crafted tools and machines to precisely measure time. Initially, this endeavor involved complex machinery, but today, a simple glance at our phones suffices to check the time. Interestingly, until the 1950s, people relied on the positions of stars and planets to tell time. These facts vividly illustrate the **remarkable evolution of technology over time.**
