Dear Lucy,

You can convince your parents by having a talk with them at lunch time or whenever you find some time with them. You can invite the producer to have a chat with your parents to let them have an idea what it is all about. Let your parents know about your involvement in the film.

You'll have to strike a sensible balance between your studies and participation in the film. You'll have to show your parents that you will have no bad influence of the entertainment industry by having good marks and giving enough time to your parents and friends.

As you are a girl, you will get really famous and because of that many guys will be attracted to you and it won't be safe for you to go to any crowded place. You'll be invited to many occasions. It can make you really busy. You'll have to sacrifice some other kinds of activities for entertainment.

If you're still planning to join entertainment industry, do take a look at the advantages and disadvantages of being an actress. Good luck with your future. Do take the advice from your parents from time to time. Studies should always be your most important thing. Take care.

Chris
